

Levels 7 – 13

Levels Seven through Thirteen are our inpatient medical/surgical floors, with two 32-bed units. Most rooms are single patient rooms, with their own 3-piece bathroom - ensuring maximum privacy and comfort. Each floor has a rehab gym for patient therapy.

All have natural light and a spectacular view across the City, and there's space for a family member to stay overnight.

At the bedside, the patient terminal is within easy reach. Patients may use it for reviewing their Health Record - test results, physician's notes, images, medication details, discharge plans, a schedule of follow up appointments and more.

Email, voice mail and video links provide access to family and friends, and may be used to communicate with the care team.

With on-line entertainment choices; restaurant-quality menu options; and the ability to control the room environment, the patient is at the centre of their hospital experience in new and personal ways like no other hospital in Canada.
